The Straight Front La Vida was the first Corset of the new vogue brought forth by an American maker. It has remained the standard. It is the logical Corset. It does not wrunch the abdomen or press upon the bust. There is absolutely no strain on the figure, except at the hips and the base of the back, where there are strong muscles to sustain the pressure of lacing.
The Straight Front La Vida is hand-made, full gored and full whalebone. Each pair is cut on the bias; only imported materials are employed in their manufacture. The New Long Hip La Vida gives a perfect set to habit skirts.
